DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klee et al, and further in view of Noguchi et al and Kazuhiro, all of record, for the reasons given in the previous action, hereby incorporated by reference. Applicants' remarks have been carefully considered, however, they are not deemed persuasive.

As stated in the previous rejection, Klee teaches the basic inventive structure with a perovskite ferroelectric structure formed on a MgO support layer, and having ReO₃ electrodes, as claimed. The reference to Noguchi adds another claimed feature of the invention with the teaching that orienting the layers of a device such as Klee, so that these laminated layers are all oriented in the same direction, for example, a (001) orientation, will result in superior performance.

Kazuhiro also shows a related device, and provides the motivation to include additional features such as conductive plugs electrically connected to an underlying element through an insulating layer, etc.

Taken together, these references teach all of the claimed structural features of the invention. Furthermore, applicants' argument with regard to the formation of the device layers in the absence of a 900 degree Celsius environment, relates to a method limitation that does not appear relevant to the claimed invention.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH

Art Unit: 2815

shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
